Bumblebees; ecology and identification

Martin Down, Hampshire

Tutor: Bryan Pinchen

10am - 3.45pm

We are all familiar with the sight of bumblebees in our gardens or the countryside. But how many people are aware that there are twenty-two species resident in Britain and Ireland? This course will serve as an introduction to bumblebees, their recognition, identification and ecology. It will be very hands-on, using a selection of mounted specimens initially, before participants use their new-found identification skills on live insects in the grassland of Martin Down NNR.

What to bring

- ▶ Lunch, water and snacks
- ▶ Notebook
- ▶ A hand lens
- ▶ Insect net if you have one

Please inform us of any medical requirements/conditions we should be aware of prior to the course

Any problems on the day please call Dominic Price on 07968 786390.
